

### Breathign Filters

A - 3029

Types Available

- BVF - HME • BVF • HME

- Breathing Filters are used in respiratory support equipment such as life support and human ventilation machine, fitted in the airway between equipment and patient. The removal of bacteria from the air breathed in the hospital environment is critical in the protection of the patients, other hospital personnel and breathing support equipment Filters utilize hydrophobic membrane & synthetic media that provide barrier & electrostatic filtration with bacterial & vital removal efficiency higher than 99.99% accomplished with extremely low resistance to airflow. The HME Keeps moisture retention and warming of inhaled air, filter design in different sizes with CO2 monitoring port, facilitate use one wider range of patients.
- Products features: Clear housing, Low flow resistance High filtration efficiency, High heat & humidity level, CO2 Mentoring level, Port Sterile package.
- Size : Adult, Paediatric  
Sterile / Disposable / Individually Packed.

### PVC Laryngeal Mask

A - 3035

- Supraglottic, non-invasive airway management device.
- Anatomically engineered mask provided with separate inflation line.
- Provided with universal 15 mm connector.
- Radio opaque line for X-ray visualization.

- Marking provided along the length to facilitate identification of tube position.
- Pilot balloon to check inflation & deflation of cuff.
- Available with DEHP free Material.  
Sterile / Disposable / Individually Packed.

Size MM
1, 1.5, 2.0 2.5, 3.0, 4.0, 5.0

### Tracheostomy Tube

A - 3032 [ Cuffed / Plain ]

- Used to maintain a patent airway through tracheostomy and mechanically ventilate patients.
- Kink resistant, thin-walled, thermo-sensitive tube, softens at body temperature.
- Lockable obturator with facility to insert guide wires to facilitate intubation using the widely accepted Seldinger guide wire technique.
- Anatomically designed tube and obturator with extra smooth and curved distal end for atraumatic intubation and extubating.
- Smooth inside / outside surface for ease in intubation, extubating and suctioning.
- Kink resistant inflation tube to ensure patient safety during cuff inflation and deflation.
- Radio opaque line and markings provided to facilitate identification of tube position.
- Universal 15 mm connector at proximal end.
- Available with DEHP free Material.  
Sterile / Disposable / Individually Packed.

Size MM
6.0, 6.5, 7.0, 7.5, 8.0, 8.5, 9.0

### Ambu Bags

A - 3036

- Hand operated, compressible self refilling ventilation bag with non-rebreathing patient valve with pressure limitation valve to minimize the risk of over inflating, intake valve with nipple for oxygen tubing.
- Supplied with oxygen reservoir bag (suitable capacity) and 2 meter oxygen tubing.
- Resuscitator can be disassembled for cleaning, disinfecting or autoclaving process.
- Size : Adult, Paediatric & Neonatal.

### Nasopharyngeal Airways

A - 3034

- Used to secure and open airways for patients in case of emergencies.
- Anatomically designed with smooth round edges, thin wall and kink resistance for maximum patient comfort.
- Available with DEHP free Material.  
Sterile / Disposable / Individually Packed.

SIZES MM

4.0, 4.5, 5.0, 5.5, 6.0, 6.5, 7.0, 7.5, 8.0, 8.5
--

Features :

- Durability and light weight.
- Easy usage and Semi-transparent.
- Good quality and best prices.
- Provide effective ventilation.
- Pressure limitation valve for patient safety.
